

U16 Series proposal-

1. Para moves back to the U16 series. The series will consist of 2 SL races, 2 GS races and a final with 1 SG, 1SL, 1GS (weather permitting). Races will be held at Roundtop, Elk and Blue for the 25-26 season. If the field size needs to be limited due to constraints of the hosting venue, then those who have earned points in a previous race will be given a spot and then the rest of the spots will be on a first come first serve basis. If the first race of the season needs to be limited then we will use last season's results, second year u16s that earned world cup points and first U16s that made U14 state championships will get an automatic spot with the rest being first come first serve.

If Passes

2. Race venues will be selected in similar fashion to the state championships.
3. The overall rankings to be calculated based on the World Cup points system calculated on full races (total of 7) and runs (total of 13 runs) while dropping the worst 1 full race and two race runs. Race runs do not need to be from the same race that was dropped. If the season is shortened to 3 or less races you would only be able to drop one run. If the season is 4 or 5 races, you would be able to drop one race and one race run. The tie breaker will be the inside out method based on full races. If still tied, then we would move to runs. This would give the racer more of a reason to push every run and not just complete the race. It would also give us more data points to get the winner.
